

"Structured Indicators to manage HEIs Quality Management Systems"

An Erasmus+ co-funded project, that aims to support HEIs in the implementation of internal QMS.

Over the last two years SMART-QUAL consortium has been working to define a **Set of Harmonized Quality Indicators** at European level to measure, monitor and assess HEIs main processes (learning and teaching; research; and relations with the society) which are expected to become an European reference framework to help HEIs develop their internal QMS.

The project is now arriving at its end, and we are very pleased to share our main results with you to explore its value and to envisage potential points to extend this work.
